

TO PROMOTE ENERGY SAVING AND EFFICIENT USE OF ENERGY

- Stimulating behaviour to reduce energy consumption in Public Administration.
- Raising the awareness of households, especially those living in blocks of flats, about the responsible use of energy and the advantages of energy audits and APE, the Energy Performance Certificate.
- Implementing training and information actions for condominium administrators, also with the involvement of the relevant trade associations, at national and regional level.
- Educating students, at all grades and levels, to behave more responsibly with regards to available energy resources.
- Supporting and encouraging large enterprises and SMEs in carrying out energy audits and in using incentive tools aimed at the installation of efficient technologies.
- Informing households and businesses about the benefits of existing incentive mechanisms, to encourage intensive use.
- Promoting the participation of credit institutions in energy efficiency financing operations, including the formation of public-private partnerships.
- Promoting training programs for the professional qualification of auditors and installers and updating courses for certified professionals, namely energy manager experts.
- Promoting building design, urban planning and interior design solutions suitable for reducing energy consumption.
- Promoting indications, good practices, and reference regulations on the various incentive mechanisms for energy efficiency.

ITALIAN NATIONAL INFORMATION AND TRAINING PROGRAMME ON ENERGY EFFICIENCY

promoted by
MINISTRY OF THE ENVIRONMENT AND ENERGY SECURITY

implemented by ENEA: "Italia in Classe A"
Italian National Information and Training Programme on Energy Efficiency, implementing the provisions on national planning contained in art 13 of Legislative Decree no. 102 of 4 July 2014, as amended by Legislative Decree no. 73 of 14 July 2020
